

Sinclair Broadcast Group stations use the public airwaves free of charge, and are required by law to serve the public interest. One-sided programs, like "Stolen Honor", a very clearly anti-John Kerry and anti-Democrat program, do not serve the public interest and are harmful to our democracy. This is the reason that I, Daniel C. Miller, a private citizen, resident of the state of Ohio, and honorably discharged veteran of the U.S. Navy, am filing this official comment to the FCC. Please do not permit or promote continued deregulation of the communications industry; it allows the consolidation of ownership of local broadcast TV and radio stations by large corporations instead of by local businesses, which would maintain the local influence and control of communications. Centralized ownership of large percentages of available media outlets enables blatant national media biasing. It allows stations to nationally broadcast politically biased programs like "Stolen Honor", a program that clearly has an anti-democratic partisan bias. The planned timing of this program is also, in my opinion, in direct violation of federal election law. If you do allow it, please insure that Sinclair stations are required by FCC ruling to air a pro-Kerry/pro-democrat program like "Going Upriver" shortly after, as this would meet the federal "equal time" requirement. Thank you.
